To Whom It May Concern,

I am pleased to recommend Mr. Tetlo Peters, a student in the BSc (Hons) Business Intelligence and Data Analytics program at Botswana Accountancy College. I have taught Tetlo in several modules and have been consistently impressed by his technical ability, creativity, and professionalism.

Tetlo has built an exceptional portfolio of applied projects, including:

- Sales trend analysis using Excel, Power BI, and Tableau.
- Predictive modelling on prediction of prostate cancer and student grading using Python and Machine Learning.
- Smart water usage analytics for Botswana, along with revamping government dashboards and corporate websites.
- Visualization Skills: Communicating insights effectively through dashboards (Power BI, Tableau, etc.) tailored for executives and operational teams.

He is certified in Power BI, Excel, Python, and Data Analytics (365 Careers), further strengthening his industry readiness.

Tetlo stands out for his analytical rigor, technical literacy, and innovative problem-solving. He works reliably under pressure, communicates insights clearly, and collaborates effectively in teams qualities that make him well suited for high-profile organizations in any sector.

I recommend him without reservation and would be pleased to provide further details if needed. Please feel free to contact me at okailem@bac.ac.bw or [+267 73003325]

Sincerely,

Dr O Marumo
Lecturer, Business Intelligence and Data Analytics Program
