Website and Multimedia Development

PROFILE

Motivated and detail-oriented, BSc(Hons) Business Intelligence and Data Analytics student at Botswana Accountancy College, with strong technical expertise in data analytics, machine learning, and business intelligence tools. Passionate about solving real-world problems through data-driven insights, and seeking opportunities to apply analytical, programming, and visualization skills to support organizational decision-making.

EDUCATION

BSc (Hons) Business Intelligence and Data Analytics
Botswana Accountancy College, Botswana
- Key Modules: Business Intelligence, Data Analytics, Machine Learning, Predictive Modelling, Digital Market Research, Data Visualization

EMPLOYMENT

Student Intern (Work Placement Program)

- To be placed in a Business Intelligence/Data Analytics/Research Unit.
- Apply analytical knowledge, build dashboards, contribute to real-world data projects, and enhance organizational reporting.

PROJECTS

Sales Trend Analysis
Built dashboards in Excel, Power BI, and Tableau to analyze and forecast sales trends.

Predictive Modelling
Developed machine learning models to predict prostate cancer outcomes and automate student grading.

Smart Water Analytics (Botswana)
Designed dashboards for government water usage analysis and revamped corporate reporting websites.

Crime & Property Data Analytics
Conducted data cleaning and built dashboards on crime trends, sales forecasting, and property valuation.

Executive Dashboards
Created tailored BI dashboards to communicate insights effectively across organizational levels.

Remodeling of website design
Improving and working on website accessibility (e.g. improving Warner Bros website)
